

607 ALMASOL® VARI-PURPOSE GEAR LUBRICANT BROCKMAN FORKLIFT, INC. Detroit, MI

Variety of Rental Equipment • SIC 7359 Equipment Rental & Leasing, nec

**LESS DOWNTIME, REDUCED GEAR WEAR, LESS REPLACEMENT PARTS
AND LESS LABOR COSTS**

CUSTOMER PROFILE

Brockman Forklift, Inc. is located in Detroit, MI. They are a heavy equipment rental and leasing company providing equipment to a multitude of companies in a large geographic area.

APPLICATION

Maintaining a wide variety of lease and rental equipment is a tremendous undertaking for any company. When the equipment is not operational, Brockman Forklift, Inc. cannot use this income-producing equipment, or put it on the line. For over 20 years they have used LE lubricants to protect their investment.

AREA OF INTEREST

Records indicate that when a commercial grade lubricant was being used, sludging and excessive wear were evident on the rental and lease fleet.

LE SOLUTION

Perfect examples of their 20 year experience with LE lubricants are the Mack trucks and Taylor forklifts. The Mack trucks are equipped with manual transmissions and Rockwell differentials using LE's 607 ALMASOL Vari-Purpose Gear Lubricant. The Taylor forklifts' differentials and planetary drive axles

also use LE's 607. LE's 607 is formulated to reduce wear, to provide heavy duty, extreme pressure characteristics, and to be long lasting in service.

CUSTOMER COST SAVINGS

Since changing to LE's 607 ALMASOL Vari-Purpose Gear Lubricant, Brockman Forklift, Inc., has experienced less downtime, reduced gear wear, less replacement parts and labor costs because of the protection they are receiving from LE's 607.

Brockman Forklift has total confidence that their equipment will continue to meet their customers' needs and produce income for them even under the conditions of being operated by persons of various skill levels.

OTHER PRODUCTS USED

LE's 1275 ALMAPLEX® Industrial Lubricant is also being used on the Taylor forklifts and Mack trucks, as well as all other vehicles as a general-purpose lubricant. LE's 1275 lasts much longer than commercial grade greases, especially in the winter months. Since converting to LE's 1275, downtime has been greatly reduced.

We want to thank Bill Kirkpatrick, Purchasing Agent and LE Representative Dave Barta (pictured) for providing the information to prepare this report.

Based on actual user experience. Individual results may vary. Product used not intended to supersede manufacturer's specifications.
