

703 MONOLEC® GEAR LUBRICANT

STEVE AXTELL, Grand Rapids, MI

Bombardier Ski Doo Snowmobile • SIC 8811 Private Household

CUSTOMER QUOTE: "Using LE products in this snowmobile has vastly improved the performance 100%."

CUSTOMER PROFILE

For recreation, LE Representative Steve Axtell races a snow mobile on riding trails and tracks. He has been using LE lubricants since 1999.

APPLICATION

Steve races a Bombardier 700 Formula Z 110 HP Ski Doo snow mobile.

AREA OF CONCERN

While using Bombardier oils, Steve was experiencing high operating temperatures, water in the gas and extreme shock from constant pounding.

LE SOLUTION

Steve started using 703 MONOLEC Gear Lubricant in the chain case on the snow mobile. LE's 703 is a multi-viscosity extreme pressure oil. It exceeds requirements for all types of differentials and transmissions in highway fleets and off-road equipment. LE's 703 is nonfoaming in service and has excellent cold temperature performance.

CUSTOMER COST SAVINGS

Since using LE's 703 in the chain case, the most extreme pressure point on the snow mobile, the operating temperature has been lowered resulting in reduced drag on the chain. The end result is the snow mobile is faster at all speeds.

ADDITIONAL PRODUCTS USED

- 2300 L-X® Heavy-Duty Chemical Supplement reduces chance of vapor lock in injectors due to the snow mobile being subjected to an over abundance of moisture during operation.
- 4622 MONOLEX MULTIPLEX® Lubricant is used on all grease points due to its low temperature pumpability. LE's 4622 stays in place so the chassis does not freeze up.
- 8104 MONOLEC® Two-Cycle Engine Oil is used to reduce heat and wear.

Steve states, "Using LE products in this snow mobile has vastly improved the performance 100%."

We would like to thank LE Representative Steve Axtell (pictured) for the information provided to prepare this report.

Based on actual user experience. Individual results may vary. Product used not intended to supersede manufacturer's specifications.
