

1275 ALAPLEX® INDUSTRIAL LUBRICANT

NORTHWEST HARD BOARD MILL

Tidland Sanders • SIC 2621 Paper Mills

CUSTOMER TESTIMONIAL

Many users have been forced to re-define "normal" or "expected" equipment life because of the exceptional wear-reduction achieved with ALMAPLEX® Industrial Lubricant.

CUSTOMER PROFILE

This company manufactures hard board and is located in northwest Oregon. They produce 112,000,000 board feet. They have been an LE customer since 1989.

APPLICATION

They use two Tidland sanders to finish the sheets of partideboard before it is ready for shipment.

AREA OF INTEREST

Their main concern was significant bearing loss on the Tidland sanders. Each bearing costs approximately \$60.00, and it takes from four to eight hours to change. The loss of a bearing causes a partial shutdown, and a costly loss of production.

LE SOLUTION

The local LE Representative recommended LE's 1275 ALMAPLEX Industrial Lubricant. LE's 1275 is an excellent general purpose EP lubricant for industrial or fleet use. It seals out dirt and water, and prevents corrosive wear.

CUSTOMER COST SAVINGS

Before changing to LE, they were replacing two to three bearings a month. ***The supervisor said, "We tried several different greases and nothing helped. Now that we have been using your grease, it is a rare event if we lose a bearing. This has definitely saved us a lot of money."***

We wish to thank the personnel at this Hard Board Manufacturer and the local LE Representative for providing the information to prepare this report.
