

CUSTOMER TESTIMONIAL

2300 L-X[®] HEAVY DUTY CHEMICAL SUPPLEMENT

ASPLUNDH TREE COMPANY, Nashville, TN

GMC Boom Trucks • SIC Ornamental Shrub and Tree Services

LE'S 2300 CLEANS INTERNAL ENGINE PARTS, PREVENTS CARBON AND GUM DEPOSITS ON RINGS, PLUGS, INJECTORS, PISTONS, VALVES, CARBURETORS AND PCV VALVES.

CUSTOMER PROFILE

Asplundh Tree Company is one of the world's most well known tree service companies. Their trademark orange trucks and equipment are widely recognized all over the country. They trim trees in Nashville for Nashville Electric Service on a contract basis.

APPLICATION

GMC Boom Trucks are used to carry the limbs, shavings and chips from trees cut away from power lines, gathered after storm damage and from clearing of land under development.

AREA OF INTEREST

One particular boom/bucket truck, which tows a 6,000+ pound chipper unit, was not running very well. The truck had very limited power and was extremely sluggish when going up hills and when trying to accelerate.

LE SOLUTION

The local LE Representative recommended 2300 L-X[®] Heavy-Duty Chemical Supplement. LE's 2300 is a fuel supplement for internal combustion engines. **It cleans internal engine parts, prevents carbon and gum deposits on rings, plugs, injectors, pistons, valves, carburetors and PCV valves.** LE's 2300 reduces friction, wear and fuel consumption.

CUSTOMER COST SAVINGS

The same boom/bucket truck previously mentioned was having problems climbing a long steep hill on one of Nashville's streets while on the way to a jobsite. On two different occasions, a local towing company was called to tow the truck to the top of the hill. This cost quite a bit of downtime for the truck and the crew. General Superintendent Henry Tomlin ordered 2300 L-X and gave a bottle of it to the truck driver John Stevens to pour in the gas tank. The improvement noticed was almost immediate. The same truck can now climb the same hill under its own power, while still towing the 6,000+ pound chipper! **The power improvement was almost unbelievable.** John came back at the end of the day and said, "Boss, I don't know what that bottle of stuff you gave me to put in the truck was, but it sure did work. It busted something loose in the fuel system and the power improvement is unreal!" Several of the other drivers and crewmembers have commented on the improvements noticed. Henry Tomlin said, "tell anybody to call me and I'll tell 'em how well the stuff works. That is the best stuff I've ever used as far as a fuel injector cleaner goes."

OTHER PRODUCTS USED

2420 BTU+ Power Supplement & Cleaner is used in the diesel chipper units and does a fantastic job.

We would like to thank General Superintendent Henry Tomlin, Crew Foreman and Truck Driver John Stevens and local LE Representative Thomas Allison (pictured) for the information provided to prepare this report.
