

2700 ALMASOL® OVEN CHAIN LUBRICANT

MARY ANN'S BAKING CO., INC, Sacramento, CA

Chubco Super-Flo Oven •

SIC 2051 Buns, Sweet, except frozen

CUSTOMER TESTIMONIAL

Amp meter readings on the oven have dropped nearly 40%

CUSTOMER PROFILE

Mary Ann's Baking Company, Inc. has been in business since 1972, producing fresh baked sweet goods. Their products are distributed to grocery chains throughout California, Washington and Oregon.

APPLICATION

The pastries are baked in a Chubco Super-Flo Oven. The bakery operates 24 hours a day, five days a week.

AREA OF INTEREST

While using a specialty grade oven chain lubricant, Mary Ann's Baking Co. was experiencing excessive wear on their oven chains. The chains were

becoming stiff due to lack of lubrication.

LE SOLUTION

In December of 1996, the local LE Representative recommended LE's 2700 ALMASOL Oven Chain Lubricant. LE's 2700 penetrates completely into the pins and bushings of the chain and has the ability to withstand heat without oxidizing up to 900°F (482°C) and contains ALMASOL, LE's exclusive wear-reducing additive.

CUSTOMER COST SAVINGS

After converting to LE's 2700, amp meter readings on the oven have dropped nearly 40%, indicating that friction has been reduced considerably on the oven chain.

We want to thank Ross Jordan, Maintenance Supervisor and local LE Representative Brian Nichols (pictured) for the information provided to prepare this report.

Based on actual user experience. Individual results may vary. Product used not intended to supersede manufacturer's specifications.
