

3752 ALMAGARD® VARI-PURPOSE LUBRICANT
CABLE TV CONSTRUCTION & INSTALLATION INC, Houston, TX
Ditch Witch Trenchers • SIC 1623 Water, Sewer and Utility Lines

CUSTOMER TESTIMONIAL

Reapplication Intervals Cut in Half!
Downtime Reduced by 75%!

CUSTOMER PROFILE

Cable TV Construction & Installation, Inc. installs underground electrical and TV cables in The Woodlands, TX. This is a pristine, heavily wooded, planned housing community of more than 30,000 people. Maintaining the natural environment has made this a very desirable place to live, work, and raise families.

APPLICATION

Cable TV Construction & Installation, Inc. uses just about every model and size of Ditch Witch Trenchers. The trenchers are used to install underground cable between all homes and businesses. There are no above ground wires or cables allowed anywhere in this community.

AREA OF INTEREST

While using various major commercial grade lubricants the trencher bearings were failing at half their normal life expectancy. Even the implementation of lost wages to the operators for

broken down equipment, failed to improve the situation. The trenchers are constantly operating in water, sand and dirt, and nothing seemed to work.

LE SOLUTION

The Local LE Sales Representative recommended LE's 3752 ALMAGARD® Vari-Purpose Lubricant. LE's 3752 is a multi-functional extreme pressure lubricant for extended service under extreme conditions in on and off road vehicles. It is very tacky, has excellent water resistance, and it will not pound out.

CUSTOMER COST SAVINGS

Once LE's 3752 was used, reapplication intervals were cut in half and downtime was reduced by 75%. The grease is so well respected that the operators, who buy their own supplies, refuse to use any other products. The owner, Dana Martin said, "**We have been able to almost double our production because of LE's 3752. What was once a major problem has now been solved**".

We would like to thank Dana Martin, Owner, and the LE Representative Jaime Ortega (pictured) for the information provided to prepare this report.

Based on actual user experience. Individual results may vary. Product used not intended to supersede manufacturer's specifications.
