

3752 ALMAGARD® VARI-PURPOSE LUBRICANT

COTTON'S INSPECTION SERVICE, Odessa, TX

Forklift • SIC 1389 Oil & Gas Field Services

CUSTOMER PROFILE

Cotton's Inspection Service inspects pipes for being crooked, having cracks, bad threads, and for cleanliness. They straighten, clean, and rethread if needed. They pressure test the pipe to over 10,000 pounds per square inch.

APPLICATION

They run a W 20B Case forklift for loading and unloading drill pipe. They also have an articulated loader used for dirt work.

AREA OF INTEREST

While using commercial lubricant, they were having problems with the grease not staying in place. It was pounding out.

LE SOLUTION

LE's 3752 ALMAGARD® Vari-Purpose Lubricant was recommended. LE's 3752 is a multi-functional, extreme pressure lubricant for extended service under extreme conditions in on and off-road vehicles. It is very tacky, has excellent water resistance and will not pound out. It is rust and corrosion inhibited.

CUSTOMER COST SAVINGS

Cotton's Inspection Service has not had any problems with

pins and other grease points running dry since they started using LE's 3752. **Their grease consumption has been reduced 33% in a short period of time.** The Owner, Cotton Davis stated, "I don't hear the forklift squeaking and groaning when they turn a corner since we switched over to LE's 3752".

We would like to thank Owner, Cotton Davis, Shop Foreman and Mechanic, Corkey Croan, Yard Supervisor, Mark Huff and local LE Representative R.K. Brown (pictured right) for the information provided to prepare this report.
