

# 3752 ALMAGARD® VARI-PURPOSE LUBRICANT THE VINDICATOR, YOUNGSTOWN, OHIO

Goss Presses • SIC 2711 Newspapers

**LE's 3752 is a multi-functional, EP lubricant for  
extended service under extreme conditions**

**CUSTOMER TESTIMONIAL**

## **CUSTOMER PROFILE**

The Vindicator is a newspaper publishing and printing company located in Youngstown, Ohio. They service five counties in eastern Ohio and western Pennsylvania. Their circulation is 85,000 daily and 125,000 on Sunday. The Vindicator has been in business since June, 1869. They have been an LE customer since June, 1998.

## **APPLICATION**

The Vindicator's main pieces of equipment are 18 Goss Mark II Presses. They also have other equipment that is used throughout the printing facility.

## **AREA OF INTEREST**

While using a commercial grade grease, Jerry Searfoss, Press Room Maintenance for 35 years, noticed problems with the grease running and slinging off. They were doing frequent lubrication of the line shaft and concerns

were being voiced about the line as well.

## **LE SOLUTION**

The local LE Lubrication Consultant recommended LE's 3752 ALMAGARD® Vari-Purpose Lubricant. LE's 3752 is a multi-functional, EP lubricant for extended service under extreme conditions. It is very tacky, has excellent water resistance and will not pound out. LE's 3752 also has a rust and corrosion inhibitor and contains LE proprietary additives ALMASOL® and QUINPLEX®.

## **CUSTOMER COST SAVINGS**

Now that the Vindicator is using LE's 3752 ALMAGARD Vari-Purpose Lubricant, Jerry Searfoss says, "The equipment noise isn't as great since switching to LE's 3752. The line shaft is much quieter and more importantly, the grease is staying where it should. It is an excellent product in the folding presses because it doesn't sling off."

We would like to thank Jerry Searfoss, Press Room Maintenance, and the local LE Lubrication Consultant Barbara Kralik (pictured) for the information provided to prepare this report.

Based on actual user experience. Individual results may vary. Product used not intended to supersede manufacturer's specifications.
