KAJIMA ENGINEERING & CONSTRUCTION CO. INC., Las Vegas, NV

Cat D10R; Kawasaki 60Z & John Deere 710

SIC 1622 Bridge, Tunnel & Elevated Hwy. Const.

**3752 lasts 4 Times Longer!
20% Reduction in Cost of Lubricant!**

CUSTOMER PROFILE

Kajima Engineering & Construction has been in business 20 years. They do engineering and construction work related to excavation projects.

APPLICATION

Kajima uses a variety of heavy equipment in their construction work. They have a fleet of 60 plus pieces of equipment including earth hauling, grading and trenching equipment, plus numerous front-end loaders and trucks.

AREA OF INTEREST

The customer was having no problems with the commercial grade lubricants they had been using, but was interested in a product that would stand up better in the hot and dusty conditions of the Southern Nevada area. Because of the dusty conditions, they also wanted better protection of bushing and pins on their equipment, to seal out these contaminants.

LE SOLUTION

The local LE representative recommended LE's 3752 ALMAGARD Vari-Purpose

Lubricant. LE's 3752 is a multi-functional EP lubricant for extended service under extreme conditions. It is very tacky and will not pound out.

CUSTOMER COST SAVINGS

After installing LE's 3752, maintenance personnel reported a 10% reduction in the loss of bushings and pins on the equipment. Prior to switching to LE's 3752, Kajima Engineering was using one drum of competitive product every six weeks. With LE's 3752, they now use only one drum every 28 weeks. **LE's 3752 is lasting four times longer than the commercial grade lubricant. This results in a 20% reduction in the cost of lubricant.**

Maintenance personnel at Kajima Engineering feel that the use of LE's 3752 ALMAGARD Vari-Purpose Lubricant has saved them an overall 47% in lubricant, labor, parts and downtime costs.

We want to thank the maintenance personnel and the local LE Representative for providing the information to prepare this report.

Based on actual user experience. Individual results may vary. Product used not intended to supersede manufacturer's specifications.
