

# 3752 ALMAGARD® VARI-PURPOSE LUBRICANT

HUNTER FAN COMPANY, Memphis, TN

Bearings in Various Equipment • SIC 3634 Electric Housewares and Fans

CUSTOMER TESTIMONIAL

## CUSTOMER PROFILE

Hunter Fan Company is located in Memphis, TN. They manufacture many well known models of fans.

## APPLICATION

Various types of equipment are used to manufacture the variety of Hunter fans.

## AREA OF INTEREST

The plant manager was concerned with the number of bearing failures occurring in the various pieces of equipment at this facility. Maintenance personnel were replacing bearings monthly because they would seize from carbon deposits. The cost to replace a bearing was \$1,000, with maintenance costs running \$100. It would take three to five hours for two people to replace one bearing.

## LE SOLUTION

The local LE Representative recommended LE's 3752 ALMAGARD Vari-Purpose Lubricant to solve their bearing problems. This lubricant is a

**3752 Lasts  
8 Times Longer!**

multi-functional, EP (extreme pressure) lubricant formulated for extended service under severe conditions. It can be used in all types of vehicles, on and off road, as well as in plant applications. LE's 3752 is very tacky, has excellent water resistance, will not pound out and is rust and corrosion inhibited. It contains ALMASOL® and QUINPLEX®, LE's proprietary additives.

## CUSTOMER COST SAVINGS

Since converting to LE's 3752 ALMAGARD Vari-Purpose Lubricant, maintenance personnel have commented that it **lasts eight times longer** than any other grease they have used. This equates to eight times less lubricant used, six times less manpower expended, and a substantial parts savings from longer bearing life. Plant personnel are very pleased with the performance of LE's 3752.

We wish to thank Maintenance Manager Kris Buchenroth and the local LE Representative for the information provided to prepare this report.

Based on actual user experience. Individual results may vary. Product used not intended to supersede manufacturer's specifications.
