

4025 QUINPLEX® FOOD MACHINERY LUBRICANT

HUEBSCH LAUNDRY CO., EAU CLAIRE, WI

American 4284 Unloader; Super and Ellis Washers • SIC 7213 Linen Supply

Grease Consumption Reduced 50%!

CUSTOMER PROFILE

Huebsch Laundry Co. is a commercial laundry service covering West Central Wisconsin and Eastern Minnesota. They have been in business since 1891 and an LE customer since 1989.

APPLICATION

They use a variety of equipment—American 4284 Unloader (shop towels or terry towels); Super washer— (continuous roll towels) and Ellis washers—in this operation.

AREA OF INTEREST

The Huebsch Laundry equipment was experiencing frequent bearing loss problems. Not only were they experiencing bearing loss, they also wanted a food grade grease (white) to eliminate the problem where their grease was dripping from the equipment and staining some of the items that had been cleaned.

LE SOLUTION

LE Representative Dave Teslaw recommended LE's 4025 QUINPLEX (H1) Food Machinery Lubricant. LE's 4025 is specifically USDA authorized and rated H1. It is white, water resistant, resists high temperatures, clings to metal, is rust and corrosion inhibited and mechanically stable.

LE's 4025 contains QUINPLEX®, LE's proprietary additive.

CUSTOMER COST SAVINGS

LE's 4025 dramatically reduced bearing loss problems, and because it is tacky and white, eliminated the staining that was occurring on some items. Jay Shimek, Maintenance Manager, indicates that LE's 4025 QUINPLEX® Food Machinery Lubricant had reduced grease consumption by about 50%, but they now use even less grease because of equipment changes and upgrades. Mr. Shimek also noted that MONOLEC® R&O Compressor/Turbine Oil reduced temperatures in their previous air compressors. As soon as warranties expire on the new air compressors, they will again use LE compressor oils. In addition, LE's 6110 and 6120 MONOLEC® Hydraulic Oils lowered temperatures in the Super and Ellis washers.

OTHER PRODUCTS USED

Other products used at the two Huebsch locations are: LE's 607 ALMASOL® Vari-Purpose Gear Lubricant; 1275 ALMAPLEX® Industrial Lubricant; 2059 MONOLEX® Penetrating Oil and Lubricant; 802 Heavy Duty Solvent Degreaser/Brake Cleaner; 4701 MONOLEC® Industrial Lubricant; and 6110 & 6120 MONOLEC® Hydraulic Oil.

We want to thank Jay Shimek, Maintenance Manager; Kirk Watton, Maintenance Supervisor, and LE Representative Dave Teslaw (pictured) for providing the information to prepare this report.

Based on actual user experience. Individual results may vary. Product used not intended to supersede manufacturer's specifications.
