

5180 PYROSHIELD®

FREEMAN FARMS TRUCKING, Portland, TN

Kenworth & Peterbuilt Trucks • SIC 4213 Trucking, except local

LE's PYROSHIELD has been formulated with a high viscosity 100% synthetic base oil, a non-melting thickening system and LE's proprietary heat stable additives.

CUSTOMER PROFILE

Freeman Farms Trucking haul produce and other items all over the United States. Steve and Lisa Freeman are the owners of Freeman Farms Trucking and have been in business for over ten years.

APPLICATION

The Freemans have over a dozen 18-wheeler Kenworth and Peterbuilt trucks they use to haul produce in all kinds of weather.

AREA OF CONCERN

They were not having any problems with the lubricant they were using on the fifth wheels on their trucks, but liked the convenience of the PYROSHIELD® in the tube.

LE SOLUTION

The local LE Representative presented 5180 PYROSHIELD® to Owner Steve Freeman and Driver Ron Scott. LE's 5180 is an extreme

pressure lubricant for year-round use on open gears, cams, cables, fifth wheels, and other sliding mechanisms.

CUSTOMER COST SAVINGS

When asked how LE's 5180 PYROSHIELD® was working, Ron Scott replied, "I drove 3,000 miles, had 8 drops, and did a lot of turning the last few days and the fifth wheel I greased with the PYROSHIELD is still wet. It had two completely dry spots on it when I greased it earlier in the week, and the area is still moist and still has plenty of grease on it."

Lubrication Engineers would like to thank Owners Steve and Lisa Freeman, Driver Ron Scott and LE Representative Thomas Allison (pictured) for the information provided to prepare this report.

Based on actual user experience. Individual results may vary. Product used not intended to supersede manufacturer's specifications.
