

6402 MONOLEC® R & O COMPRESSOR / TURBINE OIL

MAJOR SPORTS CLOTHES MANUFACTURER

Joy Twistair Model TA-190 • SIC 2261 Finishing Plant, Cotto

6402 HAS ALMOST DOUBLED NORMAL REBUILD TIME
AND THE COMPRESSOR IS STILL RUNNING FINE TO DATE

CUSTOMER TESTIMONIAL

CUSTOMER PROFILE

A Major Sports Clothes Manufacturer operates numerous plants throughout the Eastern United States. One of these plants is located in Perry, NY and does lettering and emblems on athletic clothing for high schools, colleges and other sports teams.

APPLICATION

Much of the machinery depends on compressed air for operation. The heart of the compressed air system is a Joy Twistair model TA-190 which runs 24 hours a day, six days a week, or 7,488 hours per year.

AREA OF INTEREST

This Joy Twistair was purchased in 1976 and at the time of purchase synthetic air compressor oil was recommended. The maintenance supervisor tried this synthetic oil, but was experiencing numerous problems with seals, separators, etc.

LE SOLUTION

LE's 6402 MONOLEC R & O Compressor / Turbine Oil was recommended. This oil is

formulated with special additives to control deposits and give protection against wear, corrosion and rust. It is nonfoaming and contains MONOLEC®, LE's exclusive wear-reducing additive.

CUSTOMER COST SAVINGS

This Major Sports Clothes Manufacturer absorbed three other satellite plants into the Perry, New York plant. As they discussed this move with the LE Representative, they wondered what effect this additional production would have on the 1976 compressor. The air end on the Joy Twistair compressor had never been rebuilt. This means that the compressor now has 89,912 hours on the air end. This is approximately 40,000 hours over and beyond the expectations for this machine. Normal rebuild time is about 50,000 hours on commercial air compressor oil. LE's 6402 MONOLEC R & O Compressor / Turbine Oil has almost doubled normal rebuild time and this compressor is still running fine to date.

Using high quality oil such as LE's 6402 MONOLEC R & O Compressor / Turbine Oil is an investment. The user can realistically expect that investment to be repaid in a manner such as demonstrated in this report.

We wish to thank the personnel at this Major Sports Clothes Manufacturer and Barry Wilkens (pictured) for the information provided to prepare this report.

Based on actual user experience. Individual results may vary. Product used not intended to supersede manufacturer's specifications.
