

6602 LOW TOX[®] HYDRAULIC OIL

BOW LAKE GOLF COURSE, Barry IL

Jacobsen Greensmowers • SIC 7992 Public Golf Courses

LE's LOW TOX Hydraulic Oils offer superior performance in lubrication, with long oil life and excellent wear protection

CUSTOMER TESTIMONIAL

CUSTOMER PROFILE

Bow Lake Golf Course is located in Barry, IL and has been an LE customer since April, 1996.

APPLICATION

Bow Lake Golf Course uses Jacobsen Greensmowers which are vital to this operation.

AREA OF INTEREST

Considerable amounts of hydraulic oil is used in their numerous pieces of lawn equipment. A major concern is the possibility of an oil spill on one of their greens, or for that matter, anywhere on the golf course. An oil spill, whether from a broken hose or just from leaks, can damage the grass and the environment. Of particular concern is the Jacobsen Greensmowers. These were leaking, and the greens were suffering damage.

LE SOLUTION

LE's 6602 LOW-TOX Hydraulic Oil was presented as an environmentally safe alternative. Plus, its superior base stock could soften and swell seals thus stopping minor leaks. By keeping hoses soft and pliable, LE's 6602 could also prevent major spills due to ruptured hoses.

CUSTOMER COST SAVINGS

Bow Lake Golf Course is very impressed with the performance of LE's 6602. The main benefit that they are seeing right now is that the leaks have stopped. Of course this means that no oil is getting on the grass at all. This combined with the fact that the LE's 6602 LOW-TOX would have less of an impact on the environment if there were a spill, has really assured the maintenance personnel of their decision to change to LE products.

We wish to thank Bill Bainter of Bow Lake Golf Course and the local LE Representative for providing the information to prepare this report.

Based on actual user experience. Individual results may vary. Product used not intended to supersede manufacturer's specifications.
