

**CUSTOMER TESTIMONIAL**

## 6602 LOW TOX<sup>®</sup> HYDRAULIC OIL

### OLD WAVERLY GOLF CLUB, West Point, MS

Toro 6500 Fairway Mowers • SIC 7997 Membership Sports & Recreation Clubs

#### **CUSTOMER PROFILE**

Old Waverly Golf Club, located in West Point, Mississippi, is an eighteen hole championship golf course rated by the PGA as the most challenging in Mississippi. Designed by Jerry Pate and Bob Cupp, Old Waverly was chosen as the host of the 1999 U.S. Women's Open Championship.

#### **APPLICATION**

Old Waverly Golf Club operates a variety of hydraulic reel mowers used on the greens and fairways of the golf course.

#### **AREA OF INTEREST**

A serious concern here is the possibility of a hydraulic oil leak or spill on any of their fairways or greens. Any oil spill will kill grass on fairways and greens and replacement is very expensive. Lead Mechanic Mark Barkes, having experienced the superior performance of LE's 4025 QUINPLEX<sup>®</sup> Food Machinery Lubricant in grease applications, recalled that LE made an environmentally safe alternative, 6602 LOW TOX Hydraulic Oil. He immediately decided it was time to install LE's LOW TOX Hydraulic Oil in their mowers.

## **LE SOLUTION**

LE's 6602 LOW TOX Hydraulic Oil is a low toxicity hydraulic oil with advanced product technology. LE's 6602 performs equivalent to premium hydraulic fluids, yet has low ecotoxicity for environmental concerns. It provides a low order of toxicity compared to standard commercial hydraulic oils and biodegradable hydraulic fluids.

## **CUSTOMER COST SAVINGS**

Old Waverly Golf Club is very impressed by the performance of LE's 6602 LOW TOX Hydraulic Oil. A specific dollar savings has not been established at this point but, the peace of mind of having an environmentally safe hydraulic oil in their greens mowers that will keep hoses and seals softened, with performance superior to conventional hydraulic oil with good rust and corrosion protection is immeasurable.

Mark Barkes has remarked that since changing to LE's 6602, temperatures have dropped and their hydraulic hoses are much cooler.

## **OTHER PRODUCTS USED**

4025 QUINPLEX® Food Machinery Lubricant is used in all grease applications.

We wish to thank Lead Mechanic/Maintenance Supervisor Mark Barkes, Purchasing Manager Barry Foster and the local LE Representative for the information provided to prepare this report.
