

7500 MONOLEC[®] POWER FLUID

PAPER MILL IN THE SOUTHEAST

Lift Truck • SIC 2621 Paper Mill

CUSTOMER PROFILE

This large paper mill provides paper rolls for companies worldwide. They have been in business since 1949, and an LE customer since 1993.

APPLICATION

They operate fifty 6,000 lb. capacity Yale Lift Clamp Trucks used for inverting, moving, stacking and loading finished rolls of paper. These lift trucks run 24-hours a day 7 days a week.

Yale Lift Clamp Truck

AREA OF INTEREST

They were having fires due to high temperature in the hydraulic system while using a commercial grade lubricant with a low flash point. They were experiencing hydraulic failures every 600 to 800 hours.

LE SOLUTION

LE Representative Blake Yates recommended 7500 MONOLEC[®] Power Fluid because of the high flash point (435°F) and good oxidation stability. LE's 7500 is formulated for combination gear-hydraulic systems, hydraulic transmissions, wet brakes, and torque converters. It is nonfoaming and rejects water.

CUSTOMER COST SAVINGS

*LE's 7500 has reduced the replacement of hydraulic pumps, which are about \$700.00 each. **This is a savings of \$1400.00 for every 18,000 unit hours of operation.** They had previously been replacing a pump every 5-6 weeks, and now pump replacement is virtually non-existent.*

Customer cost savings far exceed the annual cost of their lubricants.

OTHER PRODUCTS USED

*8340 MONOLEC PLUS® Engine Oil is used in the crankcases of the lift trucks. **They have doubled the drain intervals, reduced waste and have fewer leaks.***

7500 and 8340 is stocked in LE's convenient 275 gallon disposable bulk tanks.

We would like to thank the paper mill personnel and LE Representative Blake Yates for the information provided to prepare this report.
