

8104 MONOLEC® TWO-CYCLE ENGINE OIL

POLYPIPE, Sandersville, GA

STIHL MS 360 Chainsaw • SIC 3272 Concrete Products

✦ **\$6,000.00 savings in first six months of use**

✦ **CUSTOMER PROFILE**
Reduced chainsaw downtime by 80%

Polypipe is located in Sandersville, Georgia. They are one of the largest Polyethylene Pipe and fitting producers in North America. They are proud members of the Plastic Pipe Institute. They have been an LE customer since 1997.

APPLICATION

STIHL MS 360 chainsaws are used to cut scrap tubing into smaller pieces so the pieces can be thrown into a shredder and reused.

AREA OF CONCERN

Mr. Jimmy Sellars, Maintenance Planner, wanted to reduce his chainsaw downtime and the efficiency of the Reclaim Area. The STIHL MS 360 chainsaws are operated during three shifts. They were overheating causing the engines to bum up. Last year Rinker Material lost \$13,000.00 worth of chainsaws.

LE SOLUTION

LE Lubrication Consultant Mark Jones recommended 8104 MONOLEC® Two-Cycle Engine Oil. LE's 8104 is a heavy-duty two-cycle oil with outstanding additives. 8104 burns cleanly and completely, reducing heat and wear in chain saws, weed eaters, and other two-cycle equipment.

CUSTOMER COST SAVINGS

In the first six months since using

We would like to thank the personnel at Rinker Material Polypipe and LE Lubrication Consultant Mark D. Jones (pictured) for the information provided to prepare this report.

Based on actual user experience. Individual results may vary. Product used not intended to supersede manufacturer's specifications.

PolyPipe

LE's 8104, only two chainsaws were lost.

This time last year six saws were lost due to overheating and excessive use. **Chainsaw downtime has been reduced by 80%**. In six months, **one case of 8104 has saved over \$6,000.00 in parts alone**; downtime savings are not included in these figures. **The cost savings achieved for one case of 8104 has paid for all of the lubricant requirements for the entire plant!**

OTHER PRODUCTS USED

- ◆ 6404 MONOLEC® R&O Compressor/Turbine Oil – Gearboxes and blowers
- ◆ 6405 MONOLEC® R&O Compressor/Turbine Oil – Extruders
- ◆ 6802 MULTILEC® Industrial Oil – Sullair rotary screw air compressors
