

8800 MONOLEC ULTRA® ENGINE OIL

CITY OF THREE RIVERS, Three Rivers, MI

Various Equipment • SIC 9199 Local Government

- + Less oil consumption**
- + Better fuel economy**
- + Lower operating temperatures**
- + Safely extended oil drain intervals**
- + Reduced lubricant inventory**

CUSTOMER PROFILE

The City of Three Rivers Public Works Department is responsible for many city services in Southwestern Michigan. Some of their responsibilities include street maintenance, park maintenance, mowing, snow removal, sewage and water maintenance, street light maintenance, and tree and other obstacle maintenance and removal. They have been an LE customer since September 1999.

APPLICATION

The City of Three Rivers operates and maintains 130 pieces of equipment required to keep a City in operation. Their equipment includes 8 John Deere mowers, 1989-2001 Internationals, Ford, Sterlings, 3126 B Cats, Cat Loader, Backhoe, Johnson Street Sweep, Dodge pickups, and bucket trucks.

AREA OF INTEREST

When Maintenance Director Red Barnhart took over in 1999, the City's equipment was in less than satisfactory condition. Having used LE products in the past, Red knew that converting to LE was part of what he needed to do to get the equipment back up to good running conditions.

LE SOLUTION

LE Representative Barbie Graham recommended 8800 MONOLEC ULTRA® Engine Oil. LE's 8800 is for heavy-duty, long-drain service in diesel and gasoline engines. It improves fuel efficiency, reduces wear and provides all-season, all-weather performance. LE's 8800 is made from select paraffinic base oils and contains MONOLEC®, LE's exclusive wear-reducing additive. It meets and exceeds performance requirements for Caterpillar, Cummins, Detroit Diesel, Mack, Volvo, General Motors and Ford, and meets Allison C-4 requirements.

Leaders in Lubricants

CUSTOMER COST SAVINGS

Since the conversion to LE's 8800 and other LE lubricants, the City has realized that they have more than offset the initial price spent on converting to LE. They have seen less oil consumption, more fuel savings, lower operating temperatures and they have safely extended oil drain intervals to once a year. They have noticed a reduction in inventory, buying all their lubricant needs from one company and they have fewer MSDS sheets to keep track of.

Red states, "When I came here maintenance ran me. But thanks to the quality and integrity of LE products, I now run maintenance. It works."

OTHER PRODUCTS USED

- ◆ 9200 ALMASOL[®] Dry Film Lubricant - turntables on plow trucks.
- ◆ 8104 MONOLEC[®] Two-Cycle Engine Oil - all weed eaters, chainsaws, etc.
- ◆ 7500 MONOLEC[®] Power Fluid - all Allison automatics.
- ◆ 3752 ALMAGARD[®] Vari-Purpose Lubricant - all lube points
- ◆ 2059 MONOLEX[®] Penetrating Oil & Lubricant
- ◆ 6804 MULTILEC[®] Industrial Oil - all compressors
- ◆ 9102 SYNTEMP[®] Synthetic Lubricant - hard to reach greased pen areas.
- ◆ 704 MONOLEC[®] Gear Lubricant - differentials
- ◆ 8530 MONOLEC[®] SPBä Engine Oil

We would like to thank Maintenance Director Red Bamhart and LE Representative Barbie Graham for the information provided to prepare this report.
