

8800 MONOLEC ULTRA® ENGINE OIL

BOW WOW, INC., Boise, ID

Dune Buggies & Volkswagens • SIC 5531 Auto & Home Supply Stores

No other brand of petroleum lubricating oil, regardless of price, will be found superior in condition to LE's 8800 at the end of any given period use.

CUSTOMER TESTIMONIAL

CUSTOMER PROFILE

Bow Wow, Inc. located in Boise, ID sells parts and accessories for dune buggies and Volkswagens. Mike Thorton is the Owner.

APPLICATION

Bow Wow, Inc. is an accessories sales company for dune buggies and Volkswagens, and they have several employees who are avid racers. One such employee is racing a Volkswagen powered off-road vehicle that has been racing in the Nevada desert. The races are usually 250 to 400 miles and take seven to eight hours over desert sand and old mining roads.

AREA OF CONCERN

This particular engine was being lubricated with a commercial grade 15W-40 engine oil. While pulling through the sand the engine would lug and overheat. The oil pressure showed 67 lbs. using this oil, with temperatures ranging from 230°F. to 250°F. (110°C. to 121°C.).

LE SOLUTION

Bow Wow has been a customer of LE's since the mid-70s and recommends LE's 8800 MONOLEC ULTRA® Engine Oil. With the temperature problems being encountered in the off-road vehicle, it was recommended that they convert to LE's 8800 MONOLEC ULTRA® Engine Oil.

CUSTOMER COST SAVINGS

After the conversion to LE's 8800, operating temperatures dropped to a constant 210°F. (99°C.) and oil pressure went up to 74 lbs. LE's 8800 MONOLEC ULTRA contains MONOLEC, LE's exclusive wear-reducing additive, a powerful additive package and 100% paraffin base oils which provide greater film strength and lubricity.

The customer said, "I thought I was really using a pretty good oil before LE's 15W-40. The drop in temperatures really sold me."

We wish to thank Mike Thorton, Owner and LE Representative David Petroviak (pictured) for the information provided to prepare this report.

Based on actual user experience. Individual results may vary. Product used not intended to supersede manufacturer's specifications.
