Dear LE,

I am writing to thank you for making such great products. We ended our season with only one DNF and one Feature Win. All things considered, it was a very successful season.

Your 8820 Monolec Engine Oil is one of the reasons we had such a successful season. Using your oil put my mind at ease and I never had to worry about an engine failure.

The Oil performed flawlessly and I kept it changed after about every 6 race nights. This is three times the length recommended by most racing engine builders. When I drained the engine oil, it looked clean and didn't have any odor.

Your 607 Almasol and 704 Monolec Gear Lubricant provided protection and extended the life of my Rear End Differential. I started with 704, but wanted a lighter oil, so I switched to 607. This is two seasons on that Rear End without a rebuild all thanks to LE Gear Lubes!

By using your products, I can put failures due to improper lubrication completely out of my mind. This allows me to concentrate on other important things, like what the track conditions are, and how can I get to the front of the pack.

Once again your products saved me money and reduced my maintenance time. As a small race team owner, this is critical. I always have to watch every penny and squeeze the most value from each dollar invested in my race car program. Your products continue to make this easy for me!

Thank you,

Bill Waller
Race Team Owner
